Litchfield, NH 03052

E-Rate helps our district achieve the bandwidth we need to do online testing, provide access to outside resources and improve equity in access for our students. It would be helpful to have funding for actual devices for teachers and students as well as funding to improve the infrastructure of broadband in our state, the northern part of our state really needs help in this area. I'm sure that other states with rural locations have the same problems. Your work and support for education is very important to us, educators that use the program really appreciate having the assistance, so thank you for all you do to make teaching and learning equitable.
